Geoff,

As promised, attached is the EPA Region 4 NPDES OCS EA on the GHG and climate change section. Since the EA is focused on the water general permit, the analysis for GHG emissions was developed at a correspondingly modest level. Please note the document is still in draft and has not been released for public comment.

If you would like, we can schedule a teleconference with BOEM once you have reviewed the attached document. Please let me know who you would like to be invited and a convenient time. I provided the updated EPA staff contacts below and copied them on this email.

If you have any questions, please feel free to contact me.

Thanks,

Geoff,

Many, many thanks for helping set up today's call. I believe the meeting went very well and the EPA folks are excited to work with BOEM on the downstream emission analysis.

Below are the contacts for the EPA folks on the call that you may need to contact for further information.

Alex Dale and Vincent Camobreco can provide the data on emission factors and explain EPA's methodology for life-cycle analysis.

Alexander Dale, PhD
